

Baltic 1000

DVB-T | Analogue TV | DAB | AM/FM Radio

enwave presents a newly developed omni directional active antenna - the Baltic 1000. This antenna has been designed especially for the new digital broadcasting services DVB-T and DAB while simultaneously setting new standards for AM, FM and analogue TV reception as well.

The Baltic 1000 antenna fits all kinds of vessels and yachts. It suits the requirements of smaller craft as well as the demands of large distributed systems. The sophisticated design offers high reception performance even in rough offshore conditions.

enwave has developed a unique rock solid casing for the Baltic 1000 antenna. The integrated power supply can handle 9-30 V D.C. supply voltage!

The new Baltic 1000 antenna provides the following advantages

- Omni directional reception
- Simultaneous reception of TV, AM, FM
- Integrated notch filters against interference
- enwave solid rock construction
- Active antenna from 0.1-250 MHz / 470-890 MHz
- Small dimensions - easy installation
- Integrated protection circuits
- Universal mounting capabilities
- Maintenance free construction

Technical data for antenna Baltic 1000

- 0.1-250 MHz / 470-890 MHz
- 1 output
- Connectors: F-Type
- Average gain: 20 dB
- Max. output level: 106 db μ V
- Power supply 9-30 V, D.C., 2 W
- Antenna cable 75 Ohm
- Weight antenna: 1,0 kg

enwave - a new name - setting new standards.
A new extraordinary level of satisfaction.
