

**FUSION'S MOST AFFORDABLE,
COMPACT 'TRUE MARINE'
STEREO EVER.**

FUSION®

**COMPACT 'TRUE MARINE' STEREO
MS-RA50**

The MS-RA50 is FUSION's most compact marine stereo ever. The MS-RA50 has a shallow mounting depth of 55mm (2 1/8"), perfect for space conscious installations on small boats and personal watercraft, where this is especially crucial. Not only is the MS-RA50 compact in size, it features iPod® or iPhone® music playback and FUSION's innovative easy to use music interface, usually only found in FUSION's premium models.

A 'True Marine' alternative to the standard car stereos you find installed on many small boats, FUSION's MS-RA50 is designed and engineered specifically for use on the water, so it complies with IPx5 water resistant standards. The MS-RA50 is equipped with a rugged electrically isolated aluminium die cast chassis, to maintain isolation between battery negative and the hull of your metal boat. The chassis of the MS-RA50 acts as a heat sink for the entire stereo, removing the need for an external cooling fan.

3 YEAR LIMITED WARRANTY

EASY TO USE

Nearly all operations are controlled through the large Rotary Encoder, ensuring FUSION's 'True Marine' User Interface is simple and easy to use. The large 2.3" daylight viewable LCD screen displays easy to read text and makes menu navigation a breeze. The MS-RA50 has adjustable contrast and brightness for optimum viewing.

MADE FOR iPod AND iPhone

The FUSION MS-RA50 offers complete control of the iPod music library through the fully integrated iPod user interface. Connect an iPod or iPhone via the optional MS-IP15L3 cable to the rear of the unit, or house the iPod or iPhone in the optional water resistant dock (MS-IPDOCKG2), for the ultimate ease of use whilst protecting your Apple® device from the elements. iPod track, album and artist information is displayed on the LCD screen of the MS-RA50.

INCOMING CALL ALERT

When the current music source playing is iPhone, an incoming call will mute the audio and your ringtone will play through the speakers. You'll never miss a call on the water again.

AUDIO PLAYBACK

Audio Sources Include: AM / FM / iPod / iPhone and AUX (To Connect a MP3 Player). AM or FM Radio Data System (RDS) information is displayed on the LCD display.

MOUNTING ACCESSORY

Often in smaller or metal vessels it is not always possible to bulkhead mount your marine stereo. The MS-HUGMS gimble mount allows the MS-RA50 to be installed easily, anywhere on your vessel (sold separately).

MS-IPDOCKG2

MS-HUGMS

KEY FEATURES:

- AM/FM/AUX/iPod/iPhone
- Single Zone System - able to power a pair of speakers with ease.
- Left and Right Line Out for connection to an external amplifier
