FUSION®

CODE	RMS POWER
EL-F651W	20 WATTS
EL-F651B	20 WATTS
EL-FL651SPG	20 WATTS

KEY FEATURES

SHALLOW BASKET DESIGN

The shallow basket design makes the EL Series ideal for installation where mounting depth is limited, for example, in thin wall cavities. Both the Classic and Sports speaker grilles have been specifically designed to provide the ultimate in cone protection, with a modern look to complement any vessel.

DESIGNED & ENGINEERED FOR THE MARINE ENVIRONMENT

The EL Series speakers are rated IP65 for water and dust ingress protection from the front face when correctly mounted. Meeting industry standards for UV and salt fog protection, the EL Series speakers are perfect for both indoor or outdoor installation in the harsh outdoor and marine environments.

TWO STYLES AVAILABLE

Two styles are available in the EL speaker range; Classic or Sports, to suit the aesthetics of any vessel. The Sports style speakers feature a multi-color LED lighting option.

MULTI-COLOR LED LIGHTING OPTION

Multi-color LED lighting is available with the Sports styled speakers. Select one of the seven colors available to energize your on-board experience.

Note: LED color is determined by wiring configuration at installation.

TRANSLUCENT CONE

The Sports style speakers feature a translucent injection-molded polypropylene cone to ensure an even and bright LED illumination, taking your audio entertainment experience to the next level.
